ELLBRU

Re: Opportunity as Architectural BIM/Revit Technician

Dear Hiring Managers,

As someone passionate about automation and the digital integration of architecture and construction, I was thrilled to find this opportunity at ELLBRU. I am eager to bring my experiences and skills to the Architectural BIM/Revit Technician Position and help ELLBRU develop better processes and achieve targeted goals.

As an architect I have worked on +65 high-end residential projects, coupled with almost 10 years of experience in BIM and an academic degree in BIM A+ European Master in Building Information Modelling that set the seeds for me to push forward in my professional life.

The Erasmus Mundus Program BIM A+ and the 3 European universities offered me an advanced education on BIM, BIM integration in building projects and focus on collaborative practices in the AEC industry. It also helped me establish great connections with BIM professionals and exposed me to different BIM practices from all over the world.

Through my professional journey and past experiences, I have acquired expertise in concept developing, design authoring, coordinating, reviewing and, construction planning. I have led a team and inspired some of them to digitization and automation which reduced wastes and saved time and resources. I highlight biggest achievement at my previous job, I have Set BIM Standards for design and construction and introduced ISO-19650 to the company's first BIM template and guide.

Please find my resume attached and feel free to contact me. Thank you for taking the time to consider my application. I hope to hear from you soon.

Sincerely,

Aws Abdulfattah
